LATEST LEADS ON MISSOURI TANK SITE CLEANUPS

A newsletter for environmental professionals to keep you posted on developments of interest

EPA, DNR, and PSTIF all agree . . .

. . . The pace of tank site cleanups in Missouri is too slow.

In the first decade of Missouri's tanks program, (~1991-2000), approximately 3700 confirmed petroleum releases were cleaned up and received the coveted "No Further Action Letter."

In the second decade, (2001-2010), only about 1720 NFAs were issued for confirmed releases.

At the current rate, fewer than 1300 cleanups will be completed in the third decade.

We continue working with DNR and others to reverse this trend, but we need your help! Please contact the PSTIF Executive Director at 573-522-2352, or email pstif@sprintmail.com, with any suggestions or ideas.

Here's an article suggesting why you should care:
