Clarification - Construction Worker Exposures

DNR has issued a memo clarifying that you need not be concerned about construction worker exposures from COCs in an active tank pit. Reason: such workers are required to comply with industry standards that address human safety and exposures.

The memo is posted at:
http://www.pstif.org/apps/rbca_exp_pathway_tank_pits.pdf

Free Money for Plugging Wells!

Money is available to plug old wells that may serve as a conduit to contaminate drinking water sources.
Applications for this year's funds are due by December 31, 2013.

If you have non-PSTIF-eligible tank sites – or other types of cleanups – where funds to plug inactive drinking water wells would be helpful, check this out. You may have to help the water supplier for that area apply for the money, but it's well worth it. Here's the info:

Real-Time Groundwater Level Measurements

Did you know there's a network of Missouri wells where groundwater levels are continuously monitored and reported? If you're doing cleanup work near one of these wells, you may want to correlate these data with your groundwater data:

National Tanks Conference

Hope to see you at the National Tanks Conference in Denver, September 16-18. If not, you may be interested in the free live broadcasts of some sessions:
